

**Typhon Ζετα is a member of the Typhon family of unrivalled non-lethal Distraction devices that negates the risks associated with conventional pyrotechnic devices.**

Typhon Ζετα is a discreet, handheld distraction device. Typhon Ζετα is ambidextrous and initiated one handed.

The device bears no visual resemblance to regular distraction devices (It looks very similar to a USB battery pack).

This fact offers a notable advantage to the user, giving them the ability to deploy the device without any actions that pre-warn another of the events instigated reducing the likelihood of drawing enemy fire.

Typhon Ζετα is designed to be hand thrown. When thrown, Typhon Ζετα is not constrained by the normal protocols of being held in the right hand and the pin withdrawn.

As soon as the catch is released the flip-up lever is released under tension allowing the device to arm.

The release of Typhon Ζετα actions its detonation via the delay element pre-programmed.

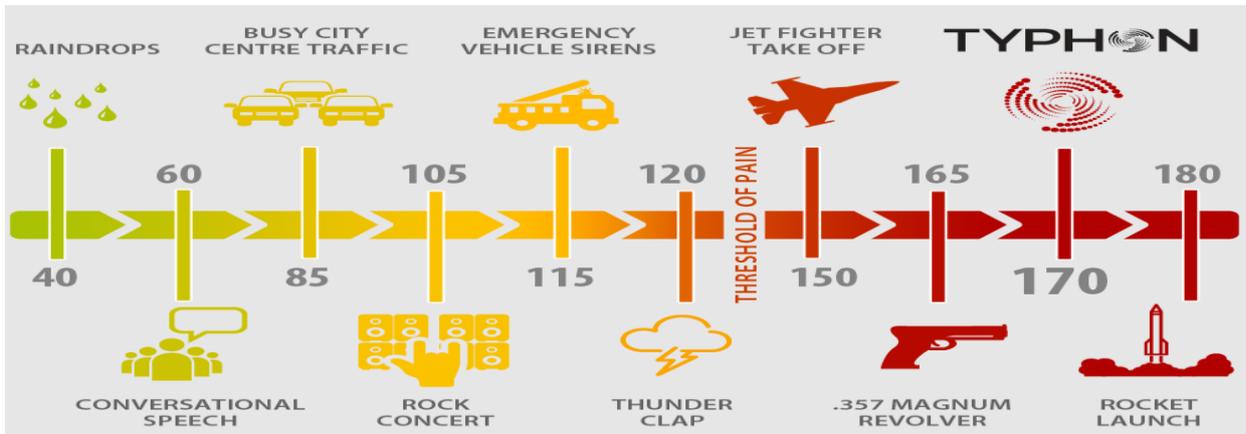

Typhon Ζετα consists of one handheld unit with the ability to initiate five independent events. An event is defined as an acoustic sound measuring 170dB.

Typhon Ζετα has assorted event programs such as;

- 5 round burst\*, which has been likened to an AK 47 on semi-automatic;
- Single shots\*, five events with random timings;
- Shock & awe\*, which is all 5 events' going off together;

*\*All of which can be programmed at time of order.*

**Typhon Delivering Dynamic Solutions for Hostile Environments**

With negligible smoke or flash and controlled fragmentation by design, personal injury or damage to property or surroundings by Typhon Ζετα is reduced to unprecedented levels when compared with the risks associated with conventional hand deployed pyrotechnic devices.

## Technical Snapshot

Typhon Zeta is a one use device. The device is rated to IP68, allowing for deployment in many extreme conditions.

Typhon Zeta's internal battery operates at 6.6 volts and promotes a double safety approach to prevent negligent discharge.

Typhon Zeta is rated to IP68 and EMC shielded to cope with extreme operational conditions.

The device is supplied in a single belt pouch or a multiple utility pouch combinations to meet their client operational requirements.

Typhon Zeta's designers understand that its clients work in demanding operational environments in which they have developed their own unique methods to accomplish the tasks they face. For this reason, Typhon Zeta has been designed for covert and overt use. Typhon Zeta is also designed to negate the higher levels of training required of traditional pyrotechnic devices. Typhon's in house development team are available to help clients adapt the device to meet their individual needs.

## **Applications**

Applications of Typhon Ζετα are currently specifically designed to meet Military and Law Enforcement requirements. These include: officer safety, prisoner relocations, close protection duties, and Cash in transit safeguarding.

Typhon Ζετα has been assessed as not listed for export control by the UK authorities. The purchaser is responsible for assessing against their own National Export Authorities Legislation.

Our products are purely British Designed and Built. They do not contain any US material or technology.

## **Ethical Policy Statement**

Typhon will not authorise our products to be marketed to any Country, State or Individual subject to Sanctions or Embargoes applicable to the United Kingdom, Great Britain and Dependent Territories.
